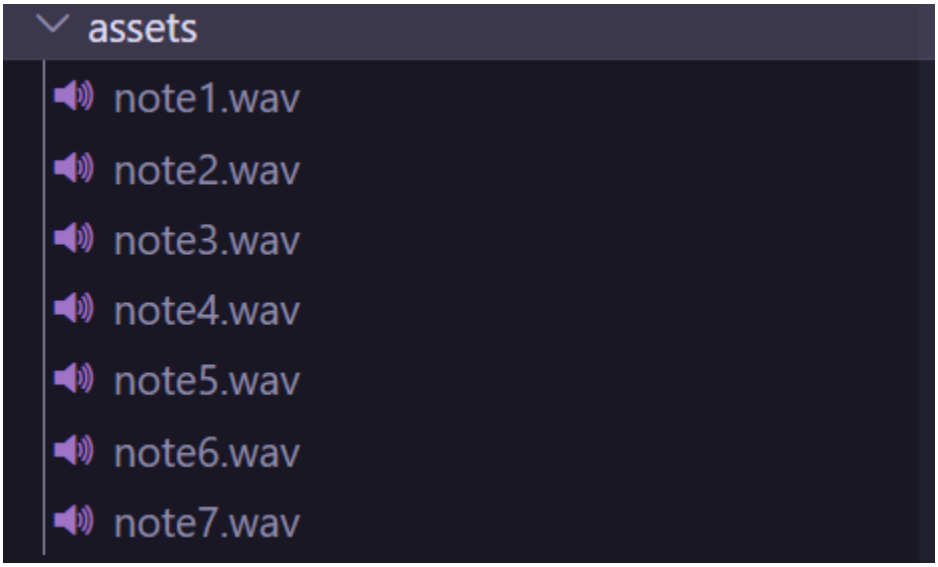
Task

Create an App **"Xylophone",**

- The app provides a graphical representation of a xylophone, usually with colorful bars or keys that resemble those of a real xylophone.
- Users can tap on the virtual xylophone bars to produce sounds.

CREATED ASSETS FOLDER:



Added assets to Pubsec.yaml File:

```yaml
! pubspec.yaml
# The following section is specific to Flutter packages.
flutter:

  # The following line ensures that the Material Icons font is
  # included with your application, so that you can use the icons in
  # the material Icons class.
  uses-material-design: true

  # To add assets to your application, add an assets section, like this:
  assets:
    - assets/note1.WAV
    - assets/note2.WAV
    - assets/note3.WAV
    - assets/note4.WAV
    - assets/note5.WAV
    - assets/note6.WAV
    - assets/note7.WAV

  # An image asset can refer to one or more resolution-specific "variants", see
  # https://flutter.dev/to/resolution-aware-images

  # For details regarding adding assets from package dependencies, see
```

Added packages for Audio:

```dart
import 'package:flutter/material.dart';
import 'package:audioplayers/audioplayers.dart';
```

Code:

```dart
import 'package:flutter/material.dart';
import 'package:audioplayers/audioplayers.dart';

void main() {
  runApp(const MaterialApp(
    home: Xylophone(),
  ));
}
class Xylophone extends StatelessWidget {
  const Xylophone({super.key});
  void PlaySound(int note){
    final player=AudioPlayer();
      player.play(AssetSource('note$note.wav')
    );
  }
  Widget Buildkey({required Color color, required int note, String label='Xylophone' }){
    return Expanded(
      child:TextButton(

        style:TextButton.styleFrom(
          backgroundColor: color,

         padding: EdgeInsets.zero,
          shape: const RoundedRectangleBorder(),

        ),

        onPressed: (){
          PlaySound(note);
        },

child: Center(
  child: Text(
    label,
    style: const TextStyle(
      color: Colors.white,
      fontSize: 20,
      fontWeight: FontWeight.bold,
    ),
  ),
),

      )
    );
  }

  @override
  Widget build(BuildContext context) {
    return Scaffold(
      body: SafeArea(
        child: Column(
          crossAxisAlignment: CrossAxisAlignment.stretch,
          children: [
            Buildkey(color: const Color.fromARGB(255, 208, 26, 13), note:  1,label:'Xylophone'),
            Buildkey(color: const Color.fromARGB(255, 235, 95, 193), note:  2,label:'Xylophone'),
            Buildkey(color: const Color.fromARGB(255, 240, 215, 54), note:  3,label:'Xylophone'),
            Buildkey(color: const Color.fromARGB(255, 68, 199, 197), note:  4,label:'Xylophone'),
            Buildkey(color: const Color.fromARGB(255, 65, 240, 117), note:  5,label:'Xylophone'),
            Buildkey(color: const Color.fromARGB(255, 14, 49, 38), note:  6,label:'Xylophone'),
            Buildkey(color: const Color.fromARGB(255, 159, 177, 235), note:  7,label:'Xylophone'),
          ],
        ),
      ),
    );
  }
}
```
